

FLEXIBLE EXHAUST CONNECTORS

The FLEX in the exhaust piping is a vital, yet all too often overlooked, component in an engine exhaust system. Applegate Industrial Materials offers a complete line of "In Stock" flexible exhaust connectors.

Our WW Series consists of 12-inch overall length flexible exhaust connectors with Schedule 40 carbon steel pipe, beveled at each end for ease of field welding, with 6 inches of ASTM A-240 T-321 Stainless Steel Corrugated flex welded in the center. We have found, through years of customer input, that this combination offers our customers the best "bang for the buck."

The FF series offers Carbon Steel 150#-rated flanges at both ends of a 12-inch overall length flex assembly. Stud Make-up Kits and gaskets are also available.

The WW and FF series are offered in standard pipe sizes ranging from 1 inch all the way up to 12 inch, and in most cases available for same-day shipment.

Of course, as always, custom lengths, sizes, alloys, and flanges are available. Please consult your Customer Service Representative.

We offer shipping by UPS, US Postal Service, Fed Ex, Emery, Greyhound Package Express, Motor Freight, or Will Call.

Applegate Industrial Materials offers easy payment options, including VISA, MasterCard, C.O.D. or 30-day invoicing, with approved credit.
